Summary & Background

(First sentence includes Department recommendation. Provide an executive summary of the action that gives an overview of the relevant details for the item.)

Ordinance 98-161 has been revised to provide updated local limits of pollutants discharged by industrial users that may affect RWR's wastewater permit limits.

RWR is required to evaluate pollutant levels every 5 years at the time wastewater plant permits are renewed. This helps to ensure that pollutants are within acceptable levels to keep Quigg Branch and Almand Branch Wastewater Plants in compliance with current permit limits which are regulated by EPD.

The only change to this ordinance is the pollutant table which contains the newly recommended limits.

Fiscal Impact / Funding Source

(Include projected cost, approved budget amount and account number, source of funds, and any future funding requirements.)
